***The criteria for approving courses in Early Childhood Education and Child Growth & Development (ECE/CG&D) for the required six (6) sch in Option #5 and the specific three (3) sch required in Option #6 is for the course content to emphasize developmental understanding of young children, and/or developmentally appropriate educational approaches for the early years. When course content meets this criteria but the course title is not early childhood or age-specific, the course description will need to indicate that the course focuses on ages between birth and five years, and/or the early years, early childhood, preschool, and/or young children. The coursework needed for completion of Option #6 (12 sch) includes ECE/CD related coursework that does not necessarily emphasize birth through 5 years (example - General Psychology) with at least 3 sch specific to child growth & development.
